

We own our 23,000km fibre network. So security begins and ends with us.

Vocus now owns one of the largest networks in Australia. Every day we're entrusted to deliver mission-critical Enterprise and Government level solutions, so it's not surprising we are making a name for ourselves as provider of the very best networks, connectivity, backup and business continuity at the top end of Government and Enterprise.

To see why Australian Enterprise, Government and Carriers entrust Vocus as their network partner, visit vocus.com.au/government or call our dedicated Government and Defence Team on **02 9434 3464** or **+61 2 8999 8999** (International).
