

AIR POWER 2020

The February/March 2021 edition of *ADM* will boast our annual Air Power coverage with an depth focus on Air programs, with 2021 celebrating 100 years since the founding of the RAAF. We will be looking at the RAAF in both this edition and the November edition of *ADM* to line up with the Avalon Air Show with this in mind.

Border Protection and Homeland Security

With the increased focus on powers and capabilities in the Home Affairs portfolio, *ADM* will examine the role of border protection efforts between Defence and the wider national security community.

From maritime to cyber, this rapidly evolving space is valuable tool of government in strategically uncertain times.

Defence Support and Infrastructure

Support and maintenance of Defence facilities is a major concern for the entire Defence organisation. As the biggest landowner in the country, there are diverse issues facing the Defence Estate and Infrastructure Group in the wake of the reform process sweeping Defence. This series of feature articles coincides with the *ADM* Defence Estate and Base Services Summit in Canberra on February 23.
