GUIDED WEAPONS

GUIDED WEAPONS

Following the announcement that precision guided munitions, hypersonic weapons, and integrated air and missile defence systems are a new Sovereign Industrial Capability Priority, *ADM* will delve into Australia's efforts to create a sovereign guided weapons capability - including the Sovereign Guided Weapons and Explosive Ordnance Enterprise, which will provide the 'enabling ecosystem' to support Defence's inventory of guided weapons and explosive ordnance.

ELECTRONIC WARFARE AND CYBER SECURITY

This month's edition will also include *ADM*'s annual feature on electronic warfare (EW) and cyber security, in support of the MilCIS conference on 22-24 February on military communications and information systems.

The ADF's electronic warfare capabilities are developing rapidly, both in early-stage industry R&D and in the delivery of new platforms across all three military branches. And as the cyber battleground continues to heat up, our coverage will also look at major developments in this sector, as well as the shifting role of Defence, other government security agencies, and defence industry in ensuring Australia's digital security.

PODCAST

This month's editorial podcast will add to our coverage of next-generation guided weapons and how they will impact the ADF's strategic planning in the years ahead.

HOT TOPICS

- Sovereign Guided Weapons and Explosive Ordnance Enterprise
- Long-range strike
- Precision guided missiles
- Surveillance and monitoring in the electromagnetic spectrum
- Offensive and defensive cyber
- Comms and information systems
