

# NEW DEFENCE TENDERS THIS WEEK: 21 May 2020

## DEFENCE WAR COLLEGE ACADEMIC AGREEMENT

### RFT 12669/JCG/ADC-1

#### *- Notice - Defence Support and Reform Group*

Further to the AusTender notification dated 26 February. The update is regarding Defence's approach to establishing a long term relationship with an Australian University to provide academic and related services to the Australian War College within the Australian Defence College. The plan remains to issue an open Request for Tender (RFT) in mid-July 2020 with an anticipated open period of three months. The RFT will be supported by an industry briefing shortly after the release of the RFT. Dependent upon social distancing and travel requirements at the time, the industry briefing may be conducted on-site at the Australian Defence College at Weston (ACT), remotely using online arrangements including a virtual tour of the campus or a combination of both. We expect to be able to confirm the location and means for conduct of the industry briefing by early June 2020. The brief will be an opportunity to engage with key members of the Australian War College. It will provide important context regarding the current activities of Australian Defence College and Defence's intention for future academic arrangements at the Weston campus. Considering the impacts related to COVID-19; we invite you to flag your institution's interest in this procurement. Defence also welcomes your advice regarding the feasibility of the planned three month tender period and your institution's ability to attend an industry briefing session physically or remotely in late July 2020.

## MARITIME EW CAPABILITY

#### *- Expression of Interest - Defence Science Institute*

Late last year the Commonwealth released a Request For Information (RFI) seeking to understand the sovereign industry capacity and maturity that is available to support delivery of the Modernisation of Maritime Electronic Warfare Program. The criteria to respond may have precluded some organisations with capability in this area from participating in the RFI. Particularly SMEs without existing security clearance, and publicly funded research organisations likewise currently lacking this accreditation or otherwise may have thought that the scope of the technology was not in their realm. Electronic warfare covers a broad range of R&D areas and as such the Commonwealth is interested in exploring and connecting with others who may not currently comply with the original RFI's participation criteria. To this end we are seeking expressions of interest from researchers and SMEs whose technical competencies they believe align with the scope.

## COMPANY OPPORTUNITIES

### MECHANICAL TESTING TOOLS

**29 MAY**

*- Expression of Interest - Rheinmetall NIOA Munitions Pty Ltd*

Rheinmetall NIOA Munitions (RNM - a joint venture between Rheinmetall Waffe Munition GmbH (RWM) and NIOA) will establish an advanced forging and manufacturing facility in Maryborough, Queensland. The forging and manufacturing facility will produce artillery shell cases and other munitions-related products for supply to the Australian Defence Force (ADF) and for export to allied nations around the world via Rheinmetall's Global Supply Chain. The ADF - through its supply arrangement with NIOA and Rheinmetall - currently imports artillery shell cases from overseas for use by the Australian Army in both training and military combat. Production from the Maryborough facility will replace imported munitions and will supplement Rheinmetall's existing munitions manufacturing base to meet demand from customers overseas. Critically, the forging and

manufacturing facility will ensure that future munitions supplies to the ADF will be Australian-made and create Australian Industry Capability for current and future munitions programs. Expressions of Interest are being sort for the following work packages:

- Supply of Mechanical Testing Equipment for production control of artillery - projectile.
