## AUXILIARY OILER REPLENISHMENT SUPPLIER, CAPABILITY & INNOVATION PORTAL

1 SEP

*- Expression of Interest - Navantia Australia Pty Ltd*

In 2016 Navantia was awarded the contract to build two (2) Auxiliary Oiler Replenishment (AOR) ships. These ships will replace existing vessels HMAS Success and HMAS Sirius and will be known as the Supply Class. The AORs will provide operational support to the Navy's fleet by providing fuel, munitions and stores. Australian industry is playing a key role in the build of the AORs with a minimum \$120 million investment into Australian products, skills and expertise. As part of this, 4,500 tonnes of steel has been sourced from Bluescope Steel. The AORs Integrated Platform Management System (IPMS) will be sustained in Australia by Sage Automation. Hobart's Taylor Bros is supplying a range of services including hospital, laundry and gallery fitouts. SAAB Australia will supply the combat management system and Raytheon Australia, the communications systems. Even though they have access to a large number of Australian suppliers and service providers, Navantia Australia is always looking to incorporate and include new ones as we are fully aware of the potential that the Australian Industry can provide. This includes Small to Medium Enterprises that are willing to be a part of an ever evolving and growing opportunity to support the Royal Australian Navy and potentially future Navantia projects.

## NEW ZEALAND TENDERS

### IT SERVICE MANAGEMENT AND IT SERVICE COSTING SOLUTION AND SOLUTION PARTNER

**RFP 1660****20 DEC**

- Request for Proposal - New Zealand Defence Force

The New Zealand Defence Force (NZDF) is seeking two related solutions: Information Technology Service Management (ITSM) and Information Technology Service Costing (ITSC) to support and enable Information & Communications Services (ICS) for NZDF. Respondents can respond to one, or both of these solutions:

ITSM:

The ITSM will enable a strategic approach for design, delivery, management and improvement of the way ICT services are consumed within the NZDF. The goal of NZDF's ITSM framework is to ensure that the right processes, people and technology are in place that enables the NZDF to meet its operational outcomes.

- The tools and software for an NZDF-wide ITSM solution based on ITIL v3.
- Design, installation and implementation of tools and software by a partner or partners.
- Day to day management and monitoring of the ITSM solution for an initial period (estimated to be 12 months initially), plus a period (estimated to be three months) for a managed handover with CIS Branch.
- Integration with required NZDF systems.
- Implementation and transition support to adopt the new platforms.

ITSC:

Service costing is critical to allow NZDF to make informed investment decisions for services and capabilities through understanding the ICT cost elements for acquisition, support and whole-of-life costs.

- The tools and software for an ITSC solution
- Design, installation and implementation of tools and software by a partner or partners.
- Integration with required NZDF systems.
- Implementation and transition support to adopt the new platforms.
